Abstract (en)

[origin: WO2016053084A1] An intermediate product (1) for producing a preferably sleeve- or bag-shaped packing means at least partially made of film material comprises a film material extending along a first portion (1a) and a second portion (1b) of the intermediate product, the film material being provided with a tearing line (53) for separating the first portion and the second portion from each other, wherein the first portion, once separated from the second portion, forms the packing means, and the second portion, while connected to the first portion, forms a part to be attached to a carrier for carrying the intermediate product. The film material is provided with a layer of added material (50) extending along the tearing line.
