Abstract (en)
[origin: WO2015114196A1] A method is provided, comprising: receiving information indicative of a video highlight summary that identifies, at least, a first highlight video segment and a second highlight video segment, the first highlight video segment being associated with a first occurrence timestamp and the second highlight video segment being associated with a second occurrence timestamp, determining a first highlight video indicator that is indicative of the first highlight video segment, determining a second highlight video indicator that is indicative of the second highlight video segment, determining an ordering of the first highlight video segment and the second highlight video segment based, at least in part, on chronological sequence of the first occurrence timestamp and the second occurrence timestamp, and causing display of the first highlight video indicator and the second highlight video indicator in conformance with the ordering.
