Abstract (en)
[origin: WO2015155049A1] The invention relates to an electric contact arrangement having a first conductor section (1) and a second conductor section (2). Each of the two conductor sections (1, 2) has an abutment region (4, 5), which regions can be clamped against one another using a clamping device (12). The abutment regions (4, 5) are supported such that they can tilt in relation to one another, and can be secured by means of the clamping device (12).
