Abstract (en)

[origin: EP3103756A1] A method for attaching a lifting element (6) to a concrete body (1, 12), wherein a hole (11) is drilled into the body (1, 12) when it is in a cured phase, after which a fixation part (10) of the lifting element (6) is fixed into said hole (11). The fixation part of the lifting element (6) comprises a self-tapping screw (10) which is screwed into said hole (11).
