Abstract (en)
[origin: WO2015121126A1] The invention relates to a refrigeration appliance comprising a cooling chamber which is delimited at the top, the rear and the bottom by a top group (5), a rear wall group (4) and a bottom group (2) that is supported on a base by means of vertically adjustable front and rear support legs (70, 71). In order to create advantageous structural and functional conditions in terms of vertical adjustability, the front and/or the rear support legs (70, 71) are provided with a vertical adjustment mechanism accessible from the top and can be vertically adjusted by said mechanism from above through the bottom group (2).
