Abstract (en)  
[origin: WO2015121125A1] The invention relates to a refrigerated display case having a framework with, on each side, a C-shaped frame (10), having a lateral vertical strut (40) on the rear side, having a lateral roof strut (50) and having a lateral lower strut, wherein the C-shaped lateral frames (10) are constructed separately and carry cladding parts which are connected by means of installation elements, surround a refrigeration chamber and belong to a floor subassembly (2), to a rear-wall subassembly (4) and to a roof subassembly (5). Advantages for the construction are achieved by the presence, between the C-shaped lateral frames (10), of at least one C-shaped interspace (10') which is spaced apart laterally from said frames, is of different design therefrom and has a horizontal floor-side intermediate strut (21), a vertical intermediate strut (41) and a roof-side intermediate strut (51).
