Abstract (en)
[origin: KR20150095184A] The present invention relates to a tomography device and a method for displaying tomography thereof. The tomography device according to an embodiment of the present invention includes: an image processing unit for restoring a tomography image by using a plurality of image data acquired in multiple part periods included in a heart rate period; and a display unit for including information representing the heart rate period and the tomography image, and displaying a screen shown by relating the part periods and a section of the tomography image corresponding to the part periods.
