Abstract (en)
[origin: WO2015117768A1] The invention relates to a fixture having a pivoting outlet, having a fixture housing (1), which is mounted such that the fixture housing (1) can pivot about a housing axis (A) and in which a valve body (9), in particular a mixing cartridge, for setting the temperature and/or amount of mixed water is arranged in a pivotally fixed manner, said valve body (9) being connected on the input side to hot and cold water lines (15, 17) and on the output side to a mixed water line (19), which leads to a water outlet (3), an adapter (11) having at least one flow passage (45), which flow-connects the valve body (9) to the mixed water line (19). According to the invention, the flow passage (45) of the adapter (11) that flow-connects the valve body (9) to the mixed water line (19) is a mixed water duct, which has an outlet opening (46), which is open in the axial direction.
