Abstract (en)

[origin: WO2015121874A1] The invention relates to a cover (1) for a connector housing (3). The invention further relates to a connector housing (3). In order to provide a cover (1) and a connector housing (3) which are easy and cost-efficient to produce and which allow safe guiding of contact terminals (35) into the connector housing (3) and also the extraction of the inserted contact terminals (35) through the cover (1), it is intended according to the invention that said cover (1) is attachable to a main body (5) of the housing (3), wherein the cover (1) comprises at least one terminal insertion channel (9), which extends along a terminal insertion direction (T), and wherein the cover (1) further comprises at least one elastically deformable terminal guiding element (13) corresponding to the at least one terminal insertion channel (9), and wherein the at least one terminal guiding element (13) protrudes into the terminal insertion channel (9). For said connector housing (3), it is intended to use said cover (1).
