Abstract (en)

The invention relates to a paint spray gun with a graduated scale that allows quickly and easily establishing the correct positioning angles of the paint spray gun, which allows optimizing its position for painting correctly and for recording the inclination parameters with respect to the horizontal and vertical position of the mentioned gun. Said gun comprises a body (1) which incorporates a graduated numerical scale (2) and respective signs (3) engraved on its surface in its upper portion (1a); and where at least one of its sides (1c) incorporates a second graduated scale (4) on its surface.
