Abstract (en)
[origin: ES2594181A1] The invention relates to a cooking field device (10) with at least one cooking field plate (12) and with at least one fixing unit (14), which is intended to be fixed to the cooking field plate. Cooking (12) and presents at least a first surface area (16) which is intended to be fixed to the cooking-field plate (12) by means of at least one adhesive layer (18), and which has at least one mounted state first distance (44) with respect to the cooking field plate (12). In order to provide a generic cooking field device with better properties in terms of an advantageous fixing, it is proposed that the fixing unit (14) has at least a second surface area (20), which is present in the assembled state a second distance with respect to the cooking field plate (12), different from the first distance (44).
