Abstract (en)
[origin: US2016252290A1] A heat-source-side unit includes a body case having an air inlet and an air outlet, a heat exchanger contained in the body case and disposed to an air passage between the air inlet and the air outlet, and a damper disposed above the heat exchanger and configured to open and close the air passage. The damper is closed in a defrosting operation that removes frost on the heat exchanger.
