Abstract (en)
[origin: WO2015121469A1] The invention proposes a cleaning apparatus (110) for the cleaning of articles (112), in particular a conveyor dishwasher. The cleaning apparatus (110) comprises at least one cleaning chamber (122) and at least one transporting apparatus (118), wherein the transporting apparatus (118) is intended for transporting the articles (112) in a transporting direction (120) through the cleaning chamber (122). The cleaning apparatus (110) has at least one nozzle system (164) for applying at least one cleaning fluid to the articles (112). The cleaning apparatus (110) also has at least one article sensor (212), which is intended for detecting loading of the transporting apparatus (118) with articles (112). The cleaning apparatus (110) further has at least one control means (194) and at least one display (216). The control means (194) is intended, in accordance with the detected loading of the transporting apparatus (118) with the articles (112), to select at least one operating mode of the cleaning apparatus (110) and to propose the selected operating mode, by means of the display (216), to a user of the cleaning apparatus (110).
