Abstract (en)  
[origin: WO2015124623A1] A concrete jaw crusher (1) comprises a first jaw (2) having a frame-type first main body (3) which defines an interior (4) of the first jaw (1) and which has a first cutting edge (5), and a second jaw (6) that has a second cutting edge (7) and is connected to the first jaw (2) in such a way as to be able to pivot about a pivot pin (8) and plunge into the interior (4). At least the first cutting edge (5) or the second cutting edge (7) is composed of two sections, each of which includes a cutting edge segment having an irregular radius of curvature.
