Abstract (en)

[origin: US2015230760A1] Disclosed is a medical device with a display and a therapeutic component to provide therapeutic functionality, and a controller to regulate operation of the therapeutic component and including processing logic to: (a) generate and render on the display an optical symbol indicative of an intended operational state of the therapeutic component; (b) receive from a user an operation code, and (c) responsive to validation of the operation code to enable the intended operational state.
