Abstract (en)  
[origin: WO2015121544A1] The invention relates to an interconnection device comprising: a wide area network interface (10) arranged to establish a connection with a base station of a plurality of wide area networks of the cellular network type; local area network interface (20) arranged to allow communication between a local device and the wide area network interface. The invention is suitable for the universal connection of any connectable device.
