Abstract (en)

An image forming apparatus according to an embodiment includes a first developing unit that supplies color toner to form a color toner image on a first photoreceptor. A second developing unit supplies decorative toner to form a decorative toner image on a second photoreceptor. The decorative toner has a decorative property of at least one of glossiness, glitter or a stereoscopic effect. A transfer unit transfers the decorative toner image and the color toner image onto a recording medium with the decorative toner overlapping at least a part of the color toner image in an overlapping area so that the decorative property is visible in the overlapping area.
