Abstract (en)  
A smoking article (30) comprises a rod (32) and a filter (34) having a longitudinal axis and a circumference. The rod (32) and the filter (34) are connected by a tipping (36), which extends about the circumference and has a rod-sided edge line (37) provided with a cut-out pattern (38) along the circumference. The pattern (38) is composed of periodically repeating subunits having a subunit length measured along the circumference. The ratio of the circumference to the subunit length is a natural number, preferably 1 or 2.
