Abstract (en)

[origin: EP3112167A1] A system includes a mounting portion and a consumable cartridge. The consumable cartridge includes an electrical interface positioned on a board, a first guide surface, and a second guide surface. The mounting portion includes a contact configured to contact the electrical interface, a first wall, and a second wall. When the consumable cartridge is inserted into the mounting portion, the first wall is received in a first space defined by the first guide surface, and the second wall is received in a second space defined by the second guide surface.
