Abstract (en)
Steering device for a boat comprising a lever (2), which lever (2) has an upper handle part (21) and a lower rod part (22), which rod part (22) has a lower end (221) for mounting to the boat. The handle part (21) has at least one control button (211) intended to generate control signals for one or more components of the boat. Moreover the lower rod part (22) is mounted so as to rotate with respect to the upper handle part (21) and there are provided means for locking the relative movement between the upper handle part (21) and the lower rod part (22).
