Abstract (en)

[origin: EP3112997A2] An electronic device has a force touch function which is capable of minimizing a degradation of picture quality, wherein the electronic device may include a housing having a receiving space, an image display module disposed in the receiving space, and a force sensing panel disposed between a bottom surface of the housing and the image display module, which enables to sense a user's force touch through the force sensing panel, and to minimize a degradation of picture quality caused by heat.
