Abstract (en)
Device for displaying a modifiable message, comprising a rotatable screen body (1) with a three-dimensional screen area, in which the screen body (1) comprises at least one flexible holder (2) which forms an enclosing sleeve around an open passage (3), and in which a number of controllable image elements are provided, at least on the outward-facing three-dimensional surface of the flexible holder (2), so that this surface acts as the screen area.
