Abstract (en)
[origin: WO2015132071A1] The invention relates to an insulating glazed element (200) comprising at least one insulating glazing unit (100) comprising at least a first (10) and a second (11) glass sheets associated together by way of an intermediate frame (50) that keeps them a certain distance from each other. According to the invention, said intermediate frame (50) is composed of at least two horizontal spacers (26) and at least two vertical spacers (25), which are transparent. The horizontal spacers (26) are composed of at least two compartments (12) and (17), which are separate and contiguous.
