Abstract (en)
[origin: WO2015132470A1] The invention relates to a shapeable molding (1) having a portion (3) formed to protrude from the mounting surface (2), the portion being manually bendable, and the portion extending as a continuous unit in the longitudinal direction of the molding, as well as means for detachably fixing the molding to the mounting surface. The means for detachably fixing the molding (1) to the mounting surface (2) comprise one or more suction cups (4) at the bottom of the portion (3) formed to protrude from the mounting surface.
