Abstract (en)

[origin: WO2015132185A1] The invention relates to a method of authenticating the carrier of a card (74) bearing identification data, the card comprising a transparent window (76) of which the dimensions are larger than that of a fingerprint (80), the method involving the following steps: taking (86) at least one first image of a fingerprint through said window with a user's finger pressed against the window; taking (90) at least one second image of a fingerprint trace through the window when the user's finger has moved away from the window; detecting (92) unique points of the fingerprint and of the trace; and checking (96) that the unique points of the fingerprint correspond to the unique points of the fingerprint trace.
