Abstract (en)

[origin: WO2015132581A1] A method is provided on a server for controlling messages transmitted to an electronic device. Message preference data is retrieved from a first database. It is then determined if a message is authorised for transmission to the electronic device according to the message preference data, and if the message is determined to be authorised, the message is transmitted from the server to the electronic device. Corresponding devices, systems and computer readable media are also disclosed.
