Abstract (en)
[origin: WO2015169717A1] The invention relates to a method for detecting the operational management of a battery store of an energy store system. In order to provide a practical solution for detecting the operational management of a battery store (6), a continuous generation of a use profile (8, 9, 10) imaging the operational management of the battery store (6) by means of the descriptive statistic is proposed.
