Abstract (en)
The present invention relates to a leak-tight tray for transporting wet products formed from a compact cardboard sheet (1) with main folding lines defining a base (3) and four side walls (4, 5) facing one another in twos. The tray comprises a tab (2) arranged in each of the four corners of the base, where each of the tabs in turn comprises two folding lines (21) joining it to two side walls and a third diagonal folding line (23) running from the corner of the base to a free edge (22) of the tab, where said tab is folded towards the inside of the tray when the side walls are raised during assembly of the tray.
