Abstract (en)
[origin: WO2015135754A1] It is problematic that modern classrooms are often not so flexibly usable that said classrooms are suitable for lecture-style teaching and also for natural-science teaching with practical instructional content. Therefore, the invention relates to a laboratory device (1), comprising a cabinet (10), which has an internal cabinet space (11), wherein a laboratory bench (20) is supported at the cabinet (10) in such a way that the laboratory bench can be pivoted about an axis of rotation (A), and wherein the laboratory bench (20) is positioned in the cabinet space (11) in a first pivot position (P1) about the pivot axis (A) and is arranged at least partially outside of the cabinet space (11) in a second pivot position (P2) about the axis of rotation (A).
