Abstract (en)  
[origin: CA2942684A1] The invention relates to a chair (1), in particular an office chair, comprising a backrest (3) that is coupled to a seat support (7) via a backrest support (5), and a seat pan (2). In order to be able to assemble the chair without using tools, the backrest support (5) is composed of two parts, i.e. a first support leg (8) associated with the seat support (7) and a second support leg (9) which is associated with the backrest (3), is joined to the first support leg (8), which is associated with the seat support, in a form-fitting plug-in connection (10), and is locked therein.
