Abstract (en)

[origin: WO2015136563A1] The container (1) for fluid products, particularly pharmaceuticals, cosmetics, medical products or the like, comprises a body (5) for containing a fluid product, a tear-off breakable closure element (9) associated with the extremity portion (7) of the body (5) to prevent the outflow of the fluid product, a cap (10) defining a channel (11) having a gap (12) for the outflow of the fluid product, which is fitted sliding on the extremity portion (7) and is movable in rotation with respect to it, wherein the cap (10) is movable sliding with respect to the body (5) between a rest position, in which the channel (11) is released in rotation from the closure element (9), and a work position, in which the channel (11) engages in rotation with the closure element (9), the latter separating from the body (5) due to the rotation of the cap (10) so as to allow the passage of the fluid product through the channel (11).
