Abstract (en)  
[origin: CA2936575A1] The invention relates to a water ride (10), which has a variable water level and a route guide (20), on which route guide at least one vehicle (12) provided for accommodating at least one rider can be moved, wherein the route guide (20) has at least one route segment (22) arranged in a stationary manner in which the at least one vehicle (12) is guided through water (30). In the region of the route segment (22), means are provided for raising or lowering the water level (32) of the water (30) in such a way that the at least one vehicle (12) can pass through the route segment (22) both in the case of an elevated water level (32a) and in the case of a lowered water level (32b).
