Abstract (en)

[origin: WO2013138264A1] A carton for holding a plurality of containers. The carton comprises a plurality of panels extending at least partially around an interior of the carton and a dispenser comprising a dispenser panel. The dispenser panel is at least partially defined by a tear line extending in at least one panel of the plurality of panels. The dispenser panel can be at least partially removable from the carton to create a dispenser opening. The carton also can comprise a handle for grasping and carrying the carton. The handle comprises a handle feature extending in at least the dispenser panel, and at least a portion of the handle can be removable from the carton with the dispenser panel.
