Abstract (en)

[origin: EP3118335A1] A support structure (32) for supporting checker bricks (5) in a hot-blast stove includes deflecting bricks (7) supporting the checker bricks (5) and support bricks (6) supporting the deflecting bricks (7). The deflecting brick (7) includes a brick body (70) and a deflecting passage (75) connected to through-holes (54) in the checker bricks (5) and opened at an opening section on a side surface of the brick body (70). The deflecting bricks (7) are arranged along an imaginary deflecting plane that partitions the inside of the hot-blast stove into an upper side and a lower side. A horizontal passages (35) connected to the deflecting passages (75) are defined between the deflecting bricks (7) and the support bricks (6).
