Abstract (en)  
Disclosed herein is a dehumidifier which has an improved usability of a user. The dehumidifier includes a main body provided with a water container mounting portion on an upper portion of which a water container is mounted, a water container detachably mounted on the water container mounting portion, a water collection tray provided inside the main body to collect water, a heat exchanger provided between the water container mounting portion and the water collection tray and a drain hole provided at the water container mounting portion to discharge water in the water container mounting portion downward.
