Abstract (en)

[origin: CN106352684A] The invention relates to a device and a method for drying a yarn sheet. The device (1) used for drying the yarn sheet (2) is provided with an inlet, an outlet, and at least two drying cylinders disposed between the inlet and the outlet. The fiber group path between the inlet and the outlet on the peripheral parts of the drying cylinders is disposed around the drying cylinders. The load of the yarns is kept small during the drying process. Every drying cylinder is provided with an own rotation driving mechanism and a control mechanism used to trigger the rotation driving mechanism independently.
