Abstract (en)
[origin: WO2015140704A1] A reclosable box, embodied in one paperboard piece (100), with an upper closure element (101A) and a lower closure element (102A) suitable for closing an upper opening (A) and a lower opening of said box, said closure elements being resistant to the opening and with a tamper-evident portion (103), breakable upon the first opening of the box; said box comprising: • - four side walls (1-4), • - an upper bottom wall or base (101) and a lower bottom wall or base (102) projecting from an upper end and from a lower end of one first (4) of said side walls (1-4), • -and two upper flaps and two lower flaps (16, 17); • - said upper and lower bottom walls or bases (101, 102) • - said bottom walls or bases (101, 102) comprising at least one break line (15A, 15B, 15C, 15D) suitable for allowing to at least partially separate said bottom walls or bases (101, 102) in at least one breakable portion (103), and in a box reclosure portion (104), • - said flaps (16, 17) comprising first box blocking and closure means (18, 19, 18B, 19B), • - and wherein said box comprises second blocking means (105) suitable for allowing an at least partial reclosure of the box after its first opening and after said breakable portion (103) is broken, characterized in that • - the upper and lower closure elements of the box consist each of three components only: said bottom wall or base and said two flaps, • said reclosure portion (104, 1104, 2104, 3104) presents a shaped surface suitable for overlapping above the opening (A) of the box to be reclosed, said shaped surface featuring an area smaller than that of said closure panel (10, 210, 310, 410, 1010, 2010, 3010) of the upper and lower bottom walls or bases (101, 102; 301, 302; 401, 402; 501, 502; 1101, 1102; 2101, 2102; 3101, 3012), and said breakable portion (103) comprises at least one part (115A, 115 B) of the closure panel so that said closure portion features a shape suitable for facilitating the reclosure of the box.
