Abstract (en)
[origin: US2015266640A1] A carton for containing a plurality of articles. The carton includes a plurality of panels that extends at least partially around an interior of the carton. The plurality of panels includes a top panel, a bottom panel, and at least one side panel foldably connected to the top panel. At least one end flap is foldably connected to at least one panel of the plurality of panels. The at least one end flap at least partially closes an end of the carton. The top panel includes a first portion foldably connected to a second portion at a fold line. The second portion is positioned at an oblique angle relative to the first portion and configured to receive at least a portion of at least one of the plurality of articles. At least one of the plurality of articles extends through the second portion.
