Abstract (en)

[origin: WO2015140302A1] The invention relates to an elevator system (100) comprising at least one elevator cab (101) and at least one counterweight (102) that can travel along a shaft-side counterweight guide (140), the elevator cab (101) and the counterweight (102) being interconnected by means of at least one balance rope (110) that can be tensioned by means of a balance rope tensioning device (120). The balance rope tensioning device (120) has at least one tensioning roll (128) which is mounted on the shaft-side counterweight guide and can travel along same.
