Abstract (en)  
[origin: WO2015140186A1] The invention relates to an incubator (10) for creating and maintaining a microclimate with controlled air humidity and temperature conditions. The incubator has a tray opening (12) for inserting trays (16) into an internal space which is bounded by walls (14a, 14b, 14c, 14d), as well as telescopic rails (20) having a first rail part (34) which can be connected to a side wall (14a, 14b) and a further second rail part (35) which can be connected to the tray (16). The invention is characterised in that the telescopic rails (20) are formed as components separately from the internal space of the incubator and from the trays (16), in that supports (22, 28) for the telescopic rails (20) are provided on the side walls (14), and in that the trays (16) can be detached from the telescopic rails (20) and the telescopic rails (20) can be detached from the supports (22, 28).
