Abstract (en)

[origin: WO2015140263A1] The invention is directed to an equipment for video and/or photo capturing, comprising at least one digital video and/or photo capture device (14) and a relative and/or absolute positioning device (16). The equipment is configured so that the at least one digital video and/or photo capture device (14) is/are sequentially triggered based on incremental movement detected by the positioning device (16). The invention is also directed to a trolley (2) with said equipment. This invention is also directed to a corresponding method of capturing videos and/or photos along a track.
