Abstract (en)

[origin: CN106362893A] The invention relates to a spray device (100) for application of a pigment medium (32) to a component (30) of a motor vehicle. The spray device includes a base body (10), a cover element (13) covering the base body (10) in the spraying direction (11) and a plurality of spray nozzles (14) arranged on the cover element (13). The spray nozzles (14) are respectively connected to a pigment line (15) and a compressed air line (16), wherein the cover element (13) and/or the spray nozzles (14) can be adjusted in a manner that the size of an application surface (31) of the pigment medium (32) can be adapted to the component (30).
