Abstract (en)

[origin: EP3121436A1] The cam follower roller device comprises a tappet body 12 extending along an axis, an insert 18 mounted in said body, a pin 14 mounted at least on said insert, and a roller 16 mounted on said pin. The tappet body 12 comprises abutting means 22 extending from an inner surface 12c of said body and at least one centring part 26 protruding axially from said abutting means. The insert 18 is mounted axially against said abutting means 22, 24 and comprises at least one hole 46 inside which said centring part 26 extends. Retaining means 60 are provided on said centring part to axially retain the insert 18 against said abutting means.
