Abstract (en)

[origin: WO2015144664A1] The invention relates to a machine tool (1), containing a housing (10); a motor (20), in particular an electric motor; a drive shaft (22), which can be driven by the motor (20); a belt drive (50) for transferring the driving force of the motor (20) to a tool; and a first fan (30) for producing a first air route (70) in the housing (10), which first air route is used to cool at least the motor (20). The first fan (30) and the belt drive (50) can be driven by means of the drive shaft (22). The machine tool (1) contains a second fan (40) for producing a second air route (80) in the housing (10), which second air route is used to cool at least the belt drive (50).
