Abstract (en)

[origin: WO2015176879A1] The invention relates inter alia to a vehicle with a ventilation system. It is provided, according to the invention, that the ventilation system has at least two controllable air transmission devices (200) which are arranged offset in the longitudinal direction (X) of the vehicle and are each indirectly or directly connected to the vehicle interior and to the surroundings of the vehicle, and a control device (30) is connected to the air transmission devices (200), said control device being configured so as to activate the controllable air transmission devices (200) depending on the particular driving situation.
