Abstract (en)

[origin: WO2015144744A2] A dispensing container for extrudable fluid materials having a collapsible tubular body with a dispensing nozzle at one end and the opposite end being closed with an end wall member biased to fold about a fold axis transverse to the longitudinal direction of the tubular body, wherein the end wall member either comprises a wall part of which two surfaces enclose a concave angle between them and being foldable about a fold axis in the direction of the length of the valley or the end wall member bulges convexly in a generally conical shape.
