Abstract (en)
[origin: WO2015144849A1] The invention relates to an antenna system (1), comprising a first antenna structure and at least one further antenna structure, which are connected to an interface, the antenna structures being suitable and designed for receiving and/or transmitting high-frequency signals, characterized in that a further antenna structure (7) arranged in a further installation space (6) is capacitively coupled at least to the first antenna structure (2) arranged in a first installation space (5).
