Abstract (en)
[origin: EP3124244A2] Mask for digital printing and operation, and printing and operation methods using the mask. Mask (M) digital printing and operation, consisting in a porous structural support mesh (1), a cover layer (2), a masking material (3) placed in between the structural (1) and the cover (2) layers, where the masking material (3) can be relatively positioned between the meshes (1, 2) thus constituting a reconfigurable mask for printing. The invention also refers to methods using the mask: attraction / repulsion method, pseudo-screen-printing, pseudo-flexo/gravure.
