Abstract (en)
[origin: EP3124673A1] The present invention relates to a laundry washing machine (1) equipped with an anti-flooding safety device (20) comprising a duct (80) having an inner hose (25) for supplying water from an external supply line (E) to the laundry washing machine (1) and an outer hose (26) surrounding the inner hose (25) such that a gap (28) is defined therebetween for withholding inside it possible leaking water. The anti-flooding safety device (20) comprises a connector (21) for the connection of distal ends (25a, 26a) of the hoses (25, 26) to the laundry washing machine (1). The connector (21) comprises a first inlet (31) and a first conduit portion (32) which fluidly connects the inner hose (25) to the laundry washing machine (1) and comprises a second inlet (41) and a second conduit portion (42) which fluidly connects the gap (28) to the inside of the cabinet (2).
