Abstract (en)

A mounting system (2) for a flushing tank (1), in particular a ceramic flushing tank comprises an inner cistern (5) and a mounting flange (6) provided with respective fastening members (37, 38) cooperating with one another for removably fixing the cistern (5) onto an upper face (32) of the flange (6) in a predetermined installation position in which the flange (6) projects laterally beyond the cistern (5) for providing support to an outer casing (7) which can be fitted to the outside of the cistern (5) to cover the cistern (5).
